Council

What's New!!

New features you will see when you are accessing TFV

Locality Page

An extra page has been added to inform you of professionals working in each locality and their contact details.

NEET model

We have integrated a module to identify Children who are at higher risk of becoming NEET from NCY 7 to 11.

Data Tooltip

A tool tip is now available when you hover over the data, to advise when the data was last updated and the data source.

Family Page

See all the family vulnerabilities on one page, hover over to see which flag relates to them

What's coming next?

School Safeguarding Overview

Developing a schools overview page to inform school leaders of vulnerabilities and needs with the cohort of pupils in their setting.

Audience views

Developing tailored views to ensure the information is as relevant as possible depending on your role.

Locality map

See the Locality on the Localities map, defining the boundaries.

New datasets

The value of Transform family view is based on the variety of the data held within it, growing this will be a key priority.

Children at risk of leaving School Early (NEET Tool)

The Somerset NEET 'Likelihood of Leaving School Early' tool incorporated into Transform Family View, has been sighted in the government's 'Get Britain Working' white paper.

We are really proud of this work, so if you work with children from Year 7 upwards to support them into Education, Employment or Training please contact us at Transform@somerset.gov.uk for further information.

NEET LIKELIHOOD PREDICTOR		Date Last Refreshed: 03/02/2025
LCS	EHM	SiDeR
Name / DOB Redacted (15 years old)		Explanation of the model
NEET LIKELIHOOD SCORE		REASONS
The model has predicted this person has:		
Number of Vulnerabilities	NEET Likelihood	
12+	Very High Likelihood	
8 to 11	High Likelihood	
5 to 7	Some Likelihood	
2 to 4	Low Likelihood	
Up to 1	Very Low Likelihood	
LIKELIHOOD SCORE EXPLANATION		
<p>The Model has predicted that this person is at a Very High Likelihood of being NEET. This score has been given because typically 50% or more of students in a similar situation went on to become NEET. This is only a tool to aid with decision making, everyone has some risk of becoming NEET and therefore professional judgement is more important than the recommendations of the model.</p>		
Vulnerability		Explanation
Issues with attendance		The individual has had poor attendance, below 90% in their year 10 school year.
Excluded		The individual has not been excluded during their academic journey.
Unauthorised Absence		The individual has not been absent for 5% or more of their year 10 school year.
PRU		The individual has not attended a PRU during their academic journey.
SEND - Educational		The individual has learning SEND difficulties.
SEND - Emotional		The individual has emotional, social/behaviour SEND difficulties.
Historic Absence		The individual has had historically high number of unauthorised absences during years 7, 8 and 9.
Historic Attendance		The individual has had historically poor attendance during years 7, 8 and 9.
Suspensions		The individual has not received a suspension during their year 10 school year.
Historic Suspensions		The individual has not received a suspension during their year 7, 8, or 9 school year.
Victim of Crime		The individual has not been recorded by the police as a victim of crime.
Perpetrator of Crime		The individual has been recorded by the police as a perpetrator of a crime.
Free School Meals		The individual has not been in receipt of free school meals over the years.
Benefits		Adult in the household has been in receipt of benefits.

We are excited to share with you the external partners who now have access to Transform. Thank you to each of you for coming on this journey to National Recognition with us. *Jo Harris Transform Service Lead*
